

Dear Ladies and Gentlemen,

herewith the specification and scope of work on the basis of which we are looking for 4 gas turbine operators for our Power Plant in Germany:

4 Shift Operators and Shift Supervisor/Manager

1. Qualifications:

- a. English speaking and reading is very important.
- b. Prior experience in Operation of Open Cycle Power Plants (Gas turbines)
- c. Legally able to work in Germany.
- d. Willing to work in Shift (day, evening, night, rest)
- e. Duration: One year (till 1 and half)
- f. Starting: As soon as possible.

2. Candidates shall be interviewed for checking their experience and communications skills.

3. Scope of Work:

- a. Sit in the control room to operate the gas turbines and Balance of Plant equipment.
- b. Tour the site and operate equipment from local controls if needed.
- c. Perform light maintenance activities.
- d. Control the PTW system and LOTO systems.
- e. Produce Reports as needed by management.
- f. Communicate with Dispatch centre and customer as needed.
- g. Support the Construction and Commissioning Team as needed.

In addition, we are constantly looking for IBN engineers, electrical engineers, automation specialists, operators, MSR specialists (I&C) and other professionals, as we coordinate, supervise and perform complex commissioning in the field of power and heat plants.

Every new colleague gives us the opportunity to develop, so every chance to gain a valuable, qualified employee is our success.

For further questions I am at Your disposal any time.
